SKILLS

Testing Methodologies: SDLC, STLC, Agile Methodology, Waterfall, Scrum, UAT, Bug Life Cycle

Bug Tracking Tools: JIRA, Mantis

Automation Testing: Selenium WebDriver, Page Object Model (POM), Maven

Programming Language: Java, Gherkin

Automation Framework: TestNG, Cucumber BDD

Testing Types: Functional, Smoke, Integration, Sanity, Regression, End-to-End, GUI, Mobile- App, Desktop

API & Web Services: REST API**,** Postman

Soft Skills: Leadership, Communication**,** Time Management, attention to detail

Cross Browser Tool: BrowserStack, LambdaTest

Automation Reporting Tool: Allure

WORK EXPERIENCE

Mathco **Bengaluru**

Product Engineer – II (QA) **Aug 2025 – Present**

- Conducted end-to-end functional, regression and API testing using Swagger to validate chatbot responses and backend service integrations.
- Collaborated closely with AI Engineers to test intent recognition accuracy, ensuring the chatbot delivered medically relevant and compliant information.
- Created and executed comprehensive test cases in TestRail, validating actual vs. expected behavior for all chatbot workflows and UI components.

PROJECT: Abbott

The project focuses on building an AI Chatbot to support Abbott's Leadless (LLPM) and Transvenous (TVPM) Pacemaker operations. The chatbot assists various personas such as doctors and technicians by providing quick responses to queries related to device functionality, procedure guidance and troubleshooting

Songdew Media Pvt Ltd. **Gurugram**

QA Engineer **Aug 2024 – July 2025**

- Designed and implemented robust automation frameworks using Selenium, Java, and Cucumber BDD, automating key functionalities across the Songdew platform which built on Angular JS, significantly reducing manual testing efforts and ensuring comprehensive test coverage.
- Reviewed project requirements and test plan from the product team, and based on that, derived detailed test cases to ensure thorough coverage of functionality and user scenarios.
- Performed User Acceptance Testing (UAT) and identified key issues such as incorrect error messages and UI inconsistencies, collaborated with the development team to resolve them efficiently and ensure a seamless end-user experience.

PROJECT: Songdew

Songdew is a platform empowering artist to manage, distribute, and promote their music globally, offering features like music distribution, subscription services, and promotions tools, ensuring artists can effectively grow their audience.

Hudson's Bay Company (HBC) **Bengaluru**

QA Engineer **Apr 2022 – Jul 2023**

- Performed comprehensive QA testing on all platforms including Android, iOS, mobile web, and web before and after deployment, ensuring seamless integration with backend databases through SQL validation.
- Conducted various testing including Smoke, Sanity, Functional, Integration, Regression, Exploratory, End-to-End and Ad Hoc testing to ensure product quality and stability.
- Created automated test scripts for cart, search modules, product array, and product description pages using Selenium with Java and the TestNG framework, focusing on validating ReactJS based UI components.
- Performed real device and mobile browser testing using LambdaTest for both Android and iOS platforms, validating user experience across diverse device-browser combinations and ensuring cross-platform consistency.
- Conducted API testing using REST protocols, leveraged Postman tool for efficient testing workflows.

PROJECT: The Bay & Zellers

The Bay and Zellers are Canadian E-Commerce retail brands under Hudson's Bay Company, offering fashion, home and lifestyle products. Both platforms serve a wide customer base through online and physical stores across Canada.

Test Yantra Software Solution **Bengaluru**

Associate Software Engineer **Nov 2021 – Apr 2022**

- Authored comprehensive manual test cases for a web application, ensuring thorough test coverage and alignment with project requirements.
- Utilized various testing techniques including functional testing, regression testing, smoke testing, and exploratory testing to identify defects and ensure software quality.
- Utilized Jira for end-to-end bug tracking, maintaining an organized and transparent record of identified issues.
- Actively participate in sprint planning, daily stand-ups, and retrospective meetings to provide input ontesting strategies and ensure alignment with project timelines and goals.

PROJECT: Fireflink

- It is an AI-Powered Script less Software Test Automation tool, which uses AI-based NLP techniques to createstable, reliable, and cut-above-automated test scripts.

EDUCATION

Bachelors of Engineering: Mechanical Engineering

Don Bosco Institute of Technology | 2021
